Road Closures and Traffic Impacts Along Main Street for Maintenance

September 6, 2018

Tentatively on Monday September 10, 2018 maintenance construction will begin on the intersection of Main Street and Grand Avenue to restore the decorative crosswalks. This work will cause temporary road closures and traffic control operations in the area.

The intersection of Grand Avenue and Main Street will include the closure of all pedestrian crossings and vehicular traffic accessing Grand Avenue. Main Street through traffic will remain open with traffic control operations to function as an alternating one-way lane within the intersection.

Pine Street and Monroe Street will be closed at the intersection of Main Street to aid in safety and minimize Main Street traffic delays.

Please be prepared for delays during this maintenance operation. The Village appreciates the community's patience during the construction. If you have any questions or concerns regarding this project please contact the Engineering Department at 920-423-3865.
