Public Hearing—2017 Budget

Moved by Trustee Elrick, seconded by Trustee Peterson to Enter into Public Hearing

Ayes 7, Nays 0 – Motion Carried

Director Matheny provided the 2017 Budget highlights of General Fund Expenditures, Levy Allocations and Budget Revenue. Michael Stouffer asked how much of the debt is paid down in principal each year and Director Matheny said with 25 million in debt approximately 2 million is paid to principal each year. Trustee Smith is in favor of 7.31 for the assessed rate as long as the money is put toward debt services and fleet. Trustee Elrick is okay with this amount as long as the extra money is put to debt services and a super majority is needed to use it for something else. Trustee Hietpas feels the tax payer's expectation is to have lower taxes when a TID has a positive balance upon close. President Vanden Berg questions if this conversation would be occurring if the schools hadn't dropped their levy amounts. He feels a 7.05 rate is adequate. Trustee Elrick stated that the rules have changed from 20 years ago because there are now rules on the levy limit. He feels the residents will benefit in the long run by paying down the debt.

Moved by Trustee Elrick, seconded by Trustee Smith to Exit out of Public Hearing

Village of Little Chute
REQUEST FOR VILLAGE BOARD CONSIDERATION

ITEM DESCRIPTION: Site Plan Consideration for Scannell Properties

PREPARED BY: James P. Fenlon, Administrator

REPORT DATE: December 2, 2016

ADMINISTRATOR'S REVIEW/COMMENTS: (See Below)

EXPLANATION: After preliminary approval in September, Scannell Properties have begun site preparations and construction on the facility per the approved development. By Board action, you required the developer to follow-up with the Board of Trustees on three items as it relates to the official site plan approval:

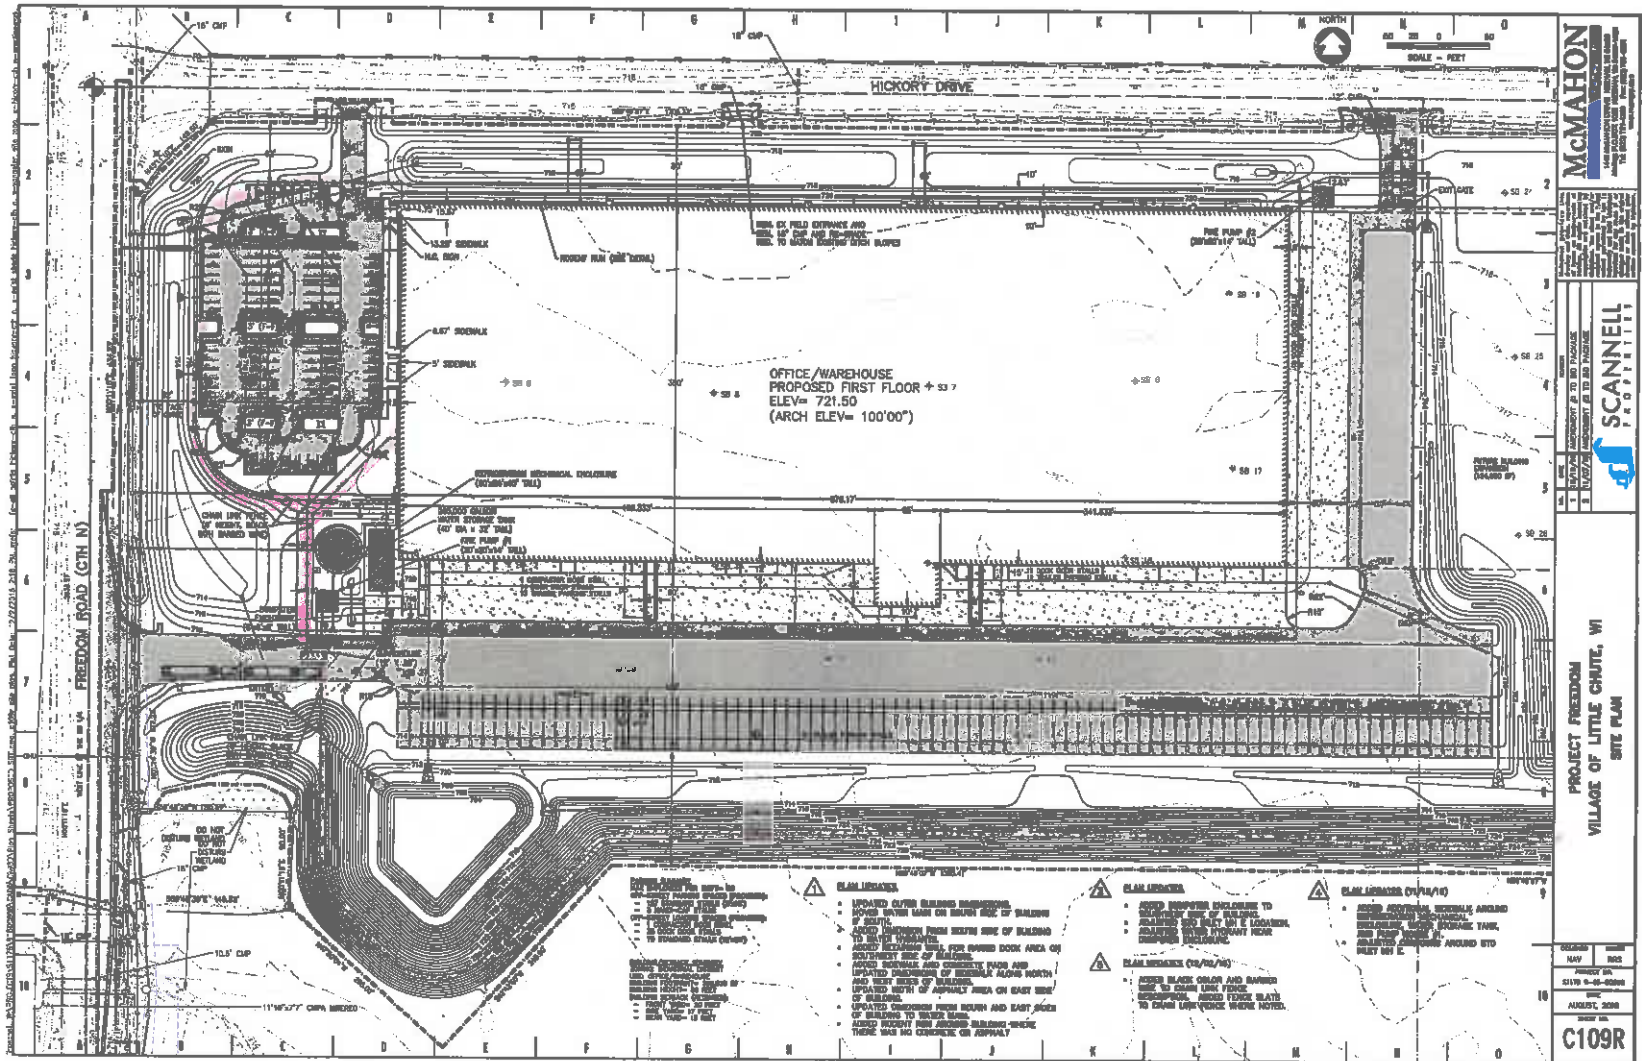

- 8' berm height
- Fence selection
- Protective screening around mechanical structure

Since that time, per the plans submitted and reviewed by staff (engineering and community development), it has been determined that the 8' berm height around the facility is adequate and should be approved.

As it pertains to the fence type, staff recommends a 90% (plus) security/privacy characteristic. While the developer included a type of security fence, staff recommends requiring they meet at least the 90% security/privacy feature. In addition, in talking with the developer, they are flexible on color selection. Staff in this instance would recommend either a black or charcoal selection for the inserted slats. It has also been requested that the developer provide the village a rendering showing the exact location of the fence, which has also been included in the packet attached.

In a meeting with staff and the developer in late November, the developer agreed to supply renderings of the protective screening around the mechanical structures in the southwest location of the building. That is depicted in the attached sketches and as you can see from these drawings, that wall height is 24' tall, looks like the other precast around the building and is acceptable to staff.

RECOMMENDATION: Discuss the items left for consideration and make a final determination on the protective screening around the mechanical structures along with final determinations on the fence type and color.
